

Revolutionize Your Future Connectivity with ClearlyIP's POTS Replacement Solution

In the ever-evolving communications landscape, ClearlyIP stands out as a pioneer, delivering innovative solutions with reliability and efficiency at their core. Say goodbye to the limitations of traditional Plain Old Telephone Service (POTS) and replace those lines with a solution powered by the new survivable ClearlyIP Failover Gateway – a transformative future-ready solution.

Liberate Your Business from Outdated Copper POTS Lines

ClearlyIP's Failover Gateway solves the last major problem that has kept most people paying for expensive legacy phone service: the issue of reliability. With this innovative multi-path solution, your business can finally transition from expensive copper phone lines without sacrificing reliability and emergency call completion assurance.

Cut costs and elevate your communications with this streamlined turn-key appliance. ClearlyIP's Failover Gateway is designed to connect your analog devices to the modern cloud, allowing seamless survivability during local Internet outages so your business can keep handling calls with bundled multi-carrier 4G wireless. Preserve the functionality of vital alarm systems, building access controls, and other devices while enjoying peace of mind with an intelligent, hassle-free solution that saves you money.

How Does it Work?

The ClearlyIP Failover Gateway, as a POTS Replacement solution, plugs easily into your LAN and can provide dial tone from ClearlyIP to the analog equipment. To do this, it utilizes its six built-in FXS ports and your location's primary Internet.

Whenever there's an Internet disruption, even during power outages, the gateway's innovative design allows a built-in 4G multi-carrier wireless link to take over until your primary connection is restored. This is essential for ensuring 911 call completion.

An optional battery-backup power supply provides enough power to allow vital calls to be placed for up to 10 hours, perfect for applications with elevator or doorway phones.

Supported Applications

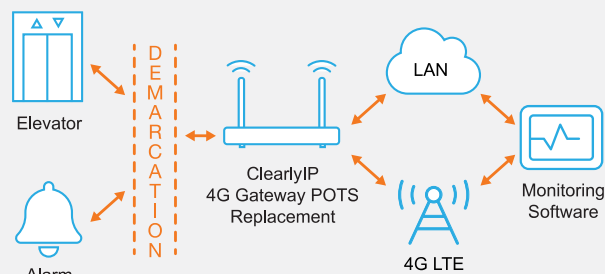

- » Security Alarm Panels
- » Fire Alarm Panels
- » Elevator Phones
- » Building Entry Phones
- » Public safety phones
- » Essential phone lines

Pricing Details

COST BREAKDOWN	
36 Month Contract	
Unlimited Domestic Calling	
Call Paths *(2 Minimum)	PRICE PER MONTH \$28/Call Path (x2) \$56.00
DIDs *(1 Minimum)	PRICE PER MONTH \$1/DID \$1.00
Pricing Includes: 4G Device, Battery Backup, and 4G SIM	

Eg. For 3 Call Paths and 6 DIDs, the cost would be \$28/Call Path x 3 + 6 x \$1/DID= \$90.00/mo
This will allow three simultaneous calls at any given time.

ClearlyIP's POTS Replacement

KEY FEATURES

MULTI-CARRIER 4G WIRELESS REDUNDANCY

A POTS Replacement solution from ClearlyIP is far more than just an appliance. Industry-leading SIP trunking with award-winning clarity and incredible pricing powers every day calling while built-in wireless service connects on-demand to a nationwide multi-carrier 4G network when needed. All this is included in ClearlyIP's turn-key bundled service for a low monthly fee.

USER-FRIENDLY DEPLOYMENT & SUPPORT

Available as a fully managed turn-key solution, a POTS replacement solution, including the ClearlyIP Failover Gateway, can be deployed and supported hassle-free. ClearlyIP's network operations team can monitor your equipment's health and provide remote support at a moment's notice, unlike a legacy carrier repair experience.

RELIABLE & REDUNDANT CONNECTIVITY

Finally, enter a new era of reliability by replacing your POTS lines with ClearlyIP Failover Gateways. Benefit from robust connectivity to the modern cloud and say goodbye to the hassles of traditional copper; regardless of circumstances, connect with your clients, partners, and teams.

VERSATILE DEPLOYMENT CHOICES

The ClearlyIP Failover Gateway will offer various options and unit combinations to satisfy each site's unique POTS replacement needs, whether you're a small business or part of an enterprise. It has flexibility that extends to multiple service options where one or more ClearlyIP Failover Gateways are provided as part of an all-inclusive monthly bundled solution or purchased separately.

SEAMLESS MIGRATION

Our team will work to ensure the transition from your old lines to Clearly Cloud is smooth. Simply plug your equipment into the unit's ports when you're notified that your service is fully activated.

COST SAVINGS AND EFFICIENCY

Using a ClearlyIP Failover Gateway as a POTS Replacement solution is not just about effortless reliability – it's also about optimizing cost. Enjoy savings on infrastructure, maintenance, and all your calling, making it a cost-effective choice for businesses of all sizes.

SECURITY AND COMPLIANCE

Your security is a priority. ClearlyIP's Failover Gateway solution is designed with essential encryption and security features to safeguard your operation and help meet regulatory requirements in your industry.

BATTERY BACKUP

The battery backup can keep your ClearlyIP Failover Gateway online for 10 hours or more during power failures. This is an essential add-on for sites with elevators or public spaces.

Choose Clearly
